SPUR-SAFRIKA KENYA

SPECIAL PROGRAMS MONITORING & EVALUATION REPORT SECOND HALF YEAR SUMMARY 2020

Special programs seeks to promote engage the larger Kibera Community. The Program has different Programs, Medical Clinic, National Hospital Insurance Fund, Ri-Ki, Oral Hygiene and Parents Skills development.

Reporting Period: July 2020 to December 2020

Organisation: Spur Afrika (Kenya)
Project Name: Special Programs

PROGRESS AGAINST OBJECTIVES IN LAST 6 MONTHS

POST COVID

Parents Support & Training

- Most parent and Caregivers who lost their sources of livelihood due to the corona virus were taken through
 a capacity building training to help them start up small businesses to help them fend for their families. The
 training topics included; setting up a business, managing their finances and creating a niche for products
 they sell.
- There were four trainers involved in the training sessions.
- 15 Parents benefited from the training. Out of the fifteen, 10 set up small businesses and or expanded the scope of the businesses they were doing.
- Spur Afrika continues to make follow up with the parents every six weeks and shall continue with the process into the New Year.

RI-KI (READ IT KNOW IT)

- As schools remain closed because of Government regulations, we continued to hold the Ri-Ki event with Spur Afrika's High School students
- We had two events in July and August. 24 students participated in the event that saw the participants get a gift of Spur celebrating ten years in Kibera, Kenya.

NHIF (National Hospital Insurance Fund)

- 83 families have been enrolled onto the NHIF Program, with 40 being enrolled between July and December.

 All of the parents and children registerd have received their NHIF cards.
- Because of hard economic situations of the parents, up to 60% have defaulted in the required co-payment of Shs. 200.
- 14 Parents are self-sponsored. 3 are not yet registered in to NHIF and two are University Students.
- Parents and children are able to access medical care when needed due to the ongoing partnership with
 Kibera Human Needs Project Hospital through Dr. Simiyu

Medical & Oral Hygiene

- We distributed toothbrush and toothpaste to 100 children under the Elimisha Program.
- Held a one day medical clinic for the sponsored children in partnership with Kibera Human Needs Project (Dr. Simiyu).
- Two Doctors, one Dentist, Two Nurses and Assistant participated in the medical clinic.

Annual General Meeting

- Spur Afrika Kenya held the Annual General meeting in October. Because of the restrictions, there were only a few people in the physical meeting with the event streamed live.
- The theme of the 2020 A.G.M was, Thanks giving, Spur Afrika's celebration of 10 years.

CHALLENGES FACED IN LAST 6 MONTHS

- The Corona Virus has been a great challenge since most of the special programs involve crowds and due \
 to Government and health restrictions, we have had to suspend all of the scheduled activities on the same
 until the situation is better and the Government restrictions are lifted.
- Although we continue to hold the events at the Spur centre; only 20 children can participate in an activity
 due to Government regulations and requirements on social distancing.
- Some children still do not understand the magnitude of Corona virus and still walk and or come to the centre without masks.

BUDGET

- So far we have utilised Ksh. 615,000 which is approximately AUS.8,200. The funds are inclusive of one
 workers salary for 6 months.
- The allocated funds were enough for the set programs

PLANS FOR NEXT 6 MONTHS

- Continue to encourage Parents to utilise NHIF when sick and pay their contributions if they can.
- Engage the Spur parents more on developing business skills
- Continue to work closely with the Kibera community in the social programs.
- Expand the reach of the oral hygiene program.
